In frame of a INCa funded project a technician/engineer position is available for 12 months to address the roles of extracellular matrix targeting CAR T cells in tumor remission. This project is performed in a consortium with researchers at EFS, Besancon (C. Ferrand) and Institut Cochin, Paris (E. Donnadieu).

The Tumor microenvironment group is looking for a highly motivated candidate who is willing to work independently but in close collaboration with and under supervision by team members on the advertised project that involves murine disease models, and technologies in cell biology and biochemistry.

Please, contact Gertraud Orend at gertraud.orend@inserm.fr
