Congratulations to our 2 PhD students **Guillaume COP** and Arun Zhang, two PhD students supervised by **Marina DESCHAMPS** and **Christophe FERRAND** (**UMR Right**, Besançon), and **Gertraud Orend** (Inserm UMR1109, Strasbourg) for this fruitful scientific collaboration.
They were indeed awarded with the best poster prize at the 6th **Innovative Therapies Days**, 8-9 October 2026, Besançon.
Their work focuses on CART-cells immunotherapies, in order to improve these approaches for optimal use in the treatment of solid tumors.
Congratulations to the teams involved for this great collective success. Each team brings their respective expertise in CART-cells cell therapies and in the knowledge of the peri-tumor extracellular matrix, reducing their therapeutic effectiveness. This reflects the dynamism of their promising research and the importance of interdisciplinary collaborations to advance these innovative therapies.
